

# If You Have *FCAMPT* Physiotherapists at Your Clinic – Here is Important Information You Should Know

Canadian Academy of  
Manipulative Physiotherapy

# CAMPT

“FCAMPT” stands for: **Fellow of the Canadian Academy of Manipulative PhysioTherapy**

## What makes FCAMPT Therapists Different?

- FCAMPTs have completed a Physiotherapy education program beyond the core University education required to become a Physiotherapist in Canada.
- FCAMPT therapists are not only in Canada, FCAMPTs are in countries around the world. FCAMPT education is regulated by the International Federation of Orthopaedic Manipulative Therapists (IFOMPT).

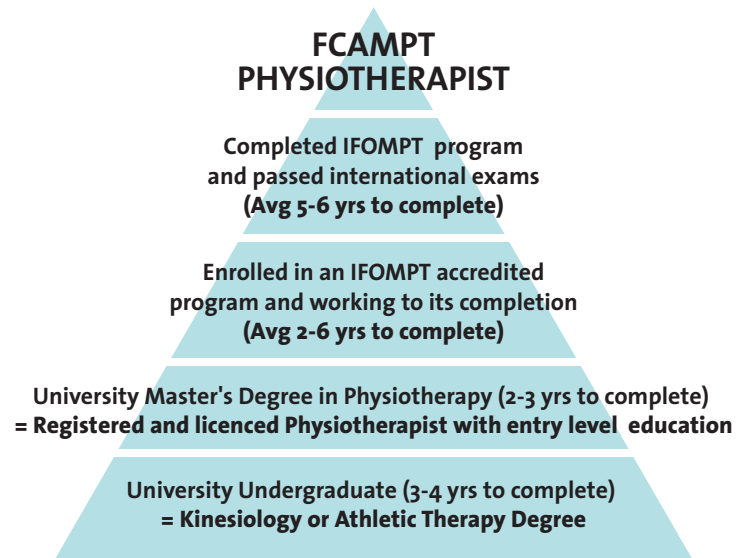

## Education IS the FCAMPT Difference

FCAMPT training improves the Physiotherapists ability to:

- **Identify, Understand and Treat** a wide range of injuries and diseases
- **To Use Hands-on** assessment and treatment techniques - improving accuracy and results
- **To Integrate Research** into assessment and treatment - making treatment and results more consistent
- **Think Globally About Injury** – what it does to function AND the impact on daily life. This means not just walking, driving and sleeping - but how it impacts family, work, financial income, hobbies, social and public responsibilities, emotions, relationships, stress... and more.
- **Think Globally About Diseases** – not just focused on what hurts; but what led to the pain, what healing and recovery can be expected, how long healing will take, what the impact will be long term on joints, nerves, organs, balance, coordination, medications... and more.

FCAMPT training permits/allows a Physiotherapist the ability to:

- **‘Manipulate Joints’** – A unique, high-level, regulated skill that can help to reduce pain and improve movement and function.

### Readers/Administrators/Users:

This outline was created to assist you in answering questions regarding the abilities and training of your FCAMPT Physiotherapists. The information provided is intended to assist patients and other inquiring parties when making an informed decision about choosing their health care practitioner. DO NOT exceed or infer beyond the information presented here. If additional questions arise beyond the provided description, have your FCAMPT Physiotherapist speak directly to the patients/parties.
