

Introduction to Clinical Research to Support Evidence-Based Practice in Manual Therapy

1 October-3 December, 2018

A Nine-Week Online Course

REGISTER HERE : <http://uoft.me/EBPFall2018>

COURSE OVERVIEW

Participants will evaluate current research and apply research evidence in their clinical setting, through online course readings, recorded lectures, discussion board participation, a critical appraisal, and a case report. By the end of this course, you will be able to find, appraise, and apply research evidence appropriately and effectively in your own practice.

NOTE: The CPA Orthopaedic Division now requires all course participants who first registered AFTER January 2014 in their course program (L1 exam), to register in this course BEFORE registering to take the 2019 Advanced Exam. This course is now a requirement of the curriculum.

INSTRUCTORS

James Braithwaite, MSc.(PT), FCAMPT, CIDN has an extensive background in Physiotherapy and physical conditioning. He holds a Master's Degree in Physical Therapy (Queen's University '10). James is a Fellow of the Canadian Academy of Manipulative Physiotherapy (FCAMPT), which is the gold standard for advanced level physiotherapy training in Canada. James has 6 years of manual physiotherapy training between seeking the FCAMPT designation and post certification mentoring of students. James is also certified in Integrated Dry Needling (CIDN).
